Right to work in the UK without sponsorship

PROFESSIONAL PROFILE

First-Class Computer Science graduate seeking a Graduate or Junior Data Analyst opportunity in the UK. Hands-on project experience in data cleaning, exploratory data analysis, KPI development and dashboard design, using SQL, Python/Pandas, Excel, Tableau and Power BI. Brings a structured problem-solving approach and a clear interest in translating raw data into actionable, stakeholder-friendly insights.

TECHNICAL SKILLS

Data analysis: Exploratory data analysis (EDA), data cleaning, transformation, validation, aggregation, KPI development, trend and anomaly analysis

Tools and languages: SQL, Python, Pandas, Excel, Tableau, Power BI

Data and communication: Relational databases, joins, reporting, dashboard design, data visualisation, analytical storytelling

SELECTED DATA ANALYTICS PROJECTS

TikTok User Behaviour Data Analysis

Independent project

Python, Pandas

- Cleaned and transformed user, content and interaction data using Python and Pandas, preparing it for reliable exploration and analysis.
- Created analytical metrics and aggregated data at multiple levels to investigate video performance, engagement, creator activity and user behaviour.
- Interpreted behavioural patterns in raw data and translated findings into meaningful analytical insights.

Seattle Airbnb Market Analysis

Independent project

Tableau

- Analysed listings, calendar and related datasets to examine pricing, occupancy, estimated revenue, neighbourhood performance and seasonal patterns in Seattle's short-term rental market.
- Prepared data relationships and developed KPIs to support consistent comparison of listing and area-level performance.
- Built interactive Tableau dashboards that visualised market patterns and enabled users to compare neighbourhoods and listing performance clearly.

EDUCATION

BSc (Hons) Computer Science — First-Class Honours

Jun 2023

Swansea University

Swansea, UK

- Built a foundation in programming, databases, software development and structured problem-solving.
- Developed a focused interest in using data cleaning, analysis and visualisation to inform business decision-making.

ADDITIONAL INFORMATION

Career focus: UK-based graduate and junior Data Analyst, Reporting Analyst and Business Intelligence Analyst opportunities.

Portfolio: Public data analytics projects and supporting materials are available at c-alun.github.io/Portfolio/.
